

## PRESS RELEASE

### **PIRELLI: CDP CONFIRMS MAXIMUM RATING FOR ITS FIGHT AGAINST CLIMATE CHANGE IN THE 'CLIMATE "A" LIST' FOR THE EIGHTH CONSECUTIVE YEAR**

*Milan, 10 December 2025* – Pirelli is confirmed for the eighth consecutive year among the global leaders in the fight against climate change by being included in the *2025 Climate A list* of the CDP, the international non-profit organization which gathered and analyzed information on decarbonization matters from over 22,100 companies.

The "A" rating in the *Climate* section, the maximum possible score, was given to Pirelli based on its decarbonization strategy which aims to reduce emissions along the entire value chain through proactive management of the risks and opportunities associated with climate change. To reach the goal of Net Zero by 2040 (target validated by SBTi), Pirelli is employing strategy initiatives that include the reduction of the carbon footprint along the supply chain, the electrification of machinery in its production processes and the development of innovative and high energy efficiency products.

Giovanni Tronchetti Provera, Executive Vice President Sustainability, New Mobility and Motorsport for Pirelli, stated: *"The confirmation of Pirelli in the CDP Climate 'A List' di CDP is a recognition of our concrete commitment to the fight against climate change and of the capacity shown by Pirelli in the management of the risks and opportunities linked to the ecological transition. The development and employment of innovative solutions for the mitigation of climate change ensures a continuing improvement of processes and products and contribute to the achievement of our goal of Net Zero by 2040"*.

The CDP - whose goal is to help companies and governments reduce their greenhouse gas emissions, protect water resources and forests - collects data related to environmental impacts, risks and opportunities, for an independent assessment with regard to the methodology with which the score is calculated. At the request of 640 investors, with assets totaling over 127 trillion dollars, these data, in 2025, were communicated through the CDP platform by the companies involved.
