

## ALLOCATION PER RIDER

2026 ITALIAN ROUND

### FRONT

| NAMING                            | COMPOUND | TYPE  | SIZE   | DESCRIPTION                                                                                                                                                                                                                                        | QTY PER RIDER |
|-----------------------------------|----------|-------|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| <b>DIABLO™</b> SLICK<br>SUPERBIKE |          |       |        |                                                                                                                                                                                                                                                    |               |
| <b>SC1</b>                        | SOFT     | RANGE | 120/70 | <b>STANDARD SOFT.</b> It is commonly the most used front tyre over the season because it adapts well to the characteristics of different circuits. It ensures a good feeling and confidence when entering corners and at maximum lean angle.       | 7             |
| <b>SC2</b>                        | MEDIUM   | RANGE | 120/70 | <b>STANDARD MEDIUM.</b> It offers a similar grip to the SC1 but guarantees more resistance to wear and greater stability at medium-high temperatures.                                                                                              | 6             |
| <b>DIABLO™</b> RAIN<br>RAIN       |          |       |        |                                                                                                                                                                                                                                                    |               |
| <b>SCR1</b>                       | RAIN     | RANGE | 120/70 | <b>STANDARD FULL WET.</b> It features a grooved tread that is ideal in conditions of heavy rain or on thoroughly wet surfaces. The compound used for this tyre guarantees maximum performance in the wet both at cold and medium-hot temperatures. | 6             |
| TOTAL FRONT TYRES                 |          |       |        |                                                                                                                                                                                                                                                    | 19            |

### REAR

| NAMING                            | COMPOUND  | TYPE  | SIZE   | DESCRIPTION                                                                                                                                                                                     | QTY PER RIDER |
|-----------------------------------|-----------|-------|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| <b>DIABLO™</b> SLICK<br>SUPERBIKE |           |       |        |                                                                                                                                                                                                 |               |
| <b>SCX</b>                        | SUPERSOFT | RANGE | 190/60 | <b>STANDARD SUPERSOFT.</b> It uses the same compound as the standard SCX used in WorldSBK and, also in this case, it is positioned as the softest solution among those available to the riders. | 7             |
| <b>SC0</b>                        | SOFT      | RANGE | 190/60 | <b>STANDARD SOFT.</b> It has a soft compound that is able to offer a good level of grip and guarantee consistent performance over distance, increasing the range of use.                        | 6             |
| <b>DIABLO™</b> RAIN<br>RAIN       |           |       |        |                                                                                                                                                                                                 |               |
| <b>SCR1</b>                       | RAIN      | RANGE | 200/60 | <b>STANDARD FULL WET.</b> It features a compound intended to offer more grip in wet conditions even at low temperatures.                                                                        | 6             |
| TOTAL REAR TYRES                  |           |       |        |                                                                                                                                                                                                 | 19            |
