PIRELLI: CDP CONFIRMS MAXIMUM RATING FOR FIGHT AGAINST CLIMATE CHANGE IN THE 'CLIMATE "A" LIST' FOR THE SEVENTH CONSECUTIVE YEAR

Milan, 7 February 2025 – Pirelli is confirmed for the seventh consecutive year among the global leaders in the fight against climate change obtaining a place in the *2024 Climate A list* of the CDP, the international non-profit organization which gathered and analyzed information on environmental matters from over 24,800 companies.

The "A" rating in the *Climate* section, the maximum possible score, was given to Pirelli based on its decarbonization strategy, the effectiveness of efforts made to reduce emissions and climate risks, and to develop a low carbon emissions economy, as well as for the completeness and transparency of information provided and its adoption of best practices associated with environmental impact. This recognition from CDP is a confirmation of Pirelli's commitment, whose long-term targets to reach Net Zero by 2040, approved by SBTi, are the most challenging among tyre makers at the global level.

The CDP, whose goal is to help companies and governments reduce their greenhouse gas emissions, protect water resources and forests, collects data related to environmental impacts, risks and opportunities, for an independent assessment with regard to the methodology with which the score is calculated. At the request of more than 700 investors, with assets totaling over 140 trillion dollars, these data, in 2024, were communicated through the CDP platform by the companies involved.
